

Unit conversion

Unit conversion function allows one single product to have 2 units, one used in product consumption function (consumption unit), another used in other functions (inventory unit).

There is a ratio between inventory unit and consumption unit. Quantity (consumption unit) inputted in product consumption (consumption unit) can be converted into inventory unit used in other functions.

If unit conversion function is enabled, at Master > Unit > Setup, there is a list of unit groups.

Unit

Name keyword Input keyword and press [Enter] will filter following list

Unit count : 6

Inventory unit	Consumption unit	Ratio	Action
box (Deleted)	box (100 units) (Deleted)	1: 1	Hide (Del)
box (Deleted)	pcs (Deleted)	1: 1	Hide (Del)
box (Deleted)	units (Deleted)	1: 1	Hide (Del)
box (100 units) (Deleted)	pcs (Deleted)	1: 1	Hide (Del)
box (100 units)	units	1: 100	Delete
units (Deleted)	pcs (Deleted)	1: 1	Hide (Del)

> Hide deleted

Users should delete the unit group that do not have conversion relationship, leaving the unit group with relationship.

Input the required ratio and press submit to save the conversion ratio.

Unit

Name keyword Input keyword and press [Enter] will filter following list

Unit count : 1

Inventory unit	Consumption unit	Ratio	Action
box (100 units)	units	1: 100	Delete

> Show deleted

At Inventory > Setup > Consumption unit setup,

Products with conversion inventory units will be displayed in the list (default bigger unit in ratio as inventory unit).

Press ratio to add product to use consumption unit, consumption unit will be appeared in the column of consumption unit.

Press consumption unit will remove product from using consumption unit.

Unit setup

Code and name keywords Input keywords and press [Enter] will filter following list

Code	Name	Inventory unit	Consumption unit	Ratio
17808	Botox-like Serum (pink box)	box (100 units)		[1] box (100 units) : [100] units
