

在 Edge 以 IE 模式使用系統

如你的電腦運行系統屬於 Windows 11 版本而未能使用 Internet Explorer，你可在 Microsoft Edge 中以 Internet Explorer 模式開啟頁面。

於 Microsoft Edge 按 設定及其他 > 設定 > 預設瀏覽器 > 允許在 Internet Explorer 模式中重新載入網站：允許 > Internet Explorer 模式頁面：新增 > 輸入你的系統網址後按新增

The screenshot shows the Microsoft Edge settings page for '預設瀏覽器' (Default Browser). The 'Internet Explorer 相容性' (Internet Explorer Compatibility) section is expanded, showing the '允許在 Internet Explorer 模式中重新載入網站' (Allow websites to be reloaded in Internet Explorer mode) option set to '允許' (Allow). The 'Internet Explorer 模式頁面' (Internet Explorer mode pages) section is also expanded, showing a '新增' (Add) button circled in red and labeled '5'. A '新增頁面' (Add page) dialog box is open, with the URL 'http://hkb2b.com.hk' entered in the '輸入 URL:' field, and the '新增' (Add) button circled in red and labeled '6'. A red arrow points from the '新增' button in the dialog to the '新增' button in the settings. On the right side, the '更多工具' (More tools) menu is open, with the '設定' (Settings) option circled in red and labeled '2'. The top right corner of the browser window shows the '更多工具' (More tools) icon circled in red and labeled '1'. The left sidebar shows the '預設瀏覽器' (Default browser) option circled in red and labeled '3'. A pink box at the bottom contains the text '輸入系統網址後按新增' (Enter system URL and press Add).
