Bottom Price Control

Control not allow lower than bottom price, allow override by one time password, allow different password represent different commission.

If bottom price control is set

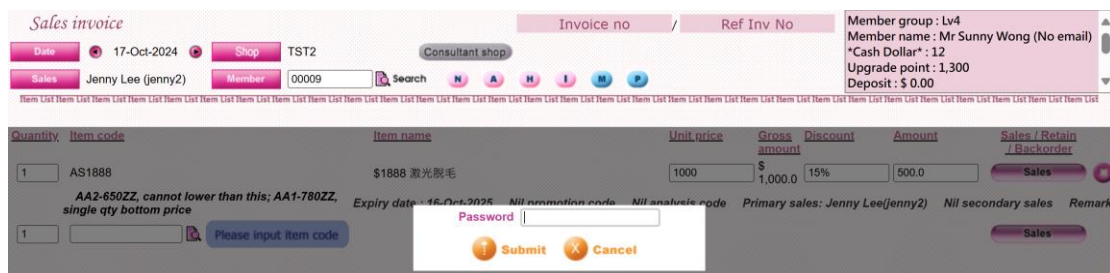

At cashiers, when inputted price is lower than bottom price, will pop up alert.

After respond the alert, will display alert box to input one time password.

Press cancel will reset the original price.

If input correct one time password, system will allow price below bottom price.

Bottom Price - setup one time password

At Point of Sale . Setup > One time password,
can setup the format and commission of one time password

One time password	<input checked="" type="checkbox"/> Allow			
	Password count	<input type="text" value="10"/>	Prefix 1 :	<input type="text" value="A"/> Commission : <input type="text" value="6"/> % <input type="text" value="v"/>
	Digits	<input type="text" value="5"/>	Prefix 2 :	<input type="text" value="B"/> Commission : <input type="text" value="2"/> % <input type="text" value="v"/>

At Staff > Staff > Edit staff > One time password,
change Yes to No and then back to Yes will reset the one time password.

One time password	Yes <input type="text" value="v"/>	1.	<input type="text" value="A2kfhb"/>
		2.	<input type="text" value="Axvyat"/>
		3.	<input type="text" value="Atqixy"/>
		4.	<input type="text" value="A0z5kq"/>
		5.	<input type="text" value="Addkvx"/>
		6.	<input type="text" value="Btiuoj"/>
		7.	<input type="text" value="B8scbd"/>
		8.	<input type="text" value="Be83t7"/>
		9.	<input type="text" value="Bo5nic"/>
		10.	<input type="text" value="Bzkeyn"/>
